

Global Float Glass Industry Market Research Report Status March 2021

Based on the Float Glass industrial chain, this report mainly elaborates the definition, types, applications and major players of Float Glass market in details. Deep analysis about market status (2015-2020), enterprise competition pattern, advantages and disadvantages of enterprise products, industry development trends (2020-2025), regional industrial layout characteristics and macroeconomic policies, industrial policy has also been included. From raw materials to downstream buyers of this industry will be analyzed scientifically, the feature of product circulation and sales channel will be presented as well. In a word, this report will help you to establish a panorama of industrial development and characteristics of the Float Glass market.

Under COVID-19 Outbreak, how the Float Glass Industry will develop is also analyzed in detail in Chapter 1.7 of this report. In Chapter 2.6, we analyzed the impact of COVID-19 on the product industry chain based on the upstream and downstream markets. In Chapters 7 of the report, we analyze the impact of COVID-19 on various regions and major countries. In chapter 10.8, the impact of COVID-19 on the future development of the industry is pointed out.

This is only a sample. The data in sample is not real. And the final report might be different from the sample.

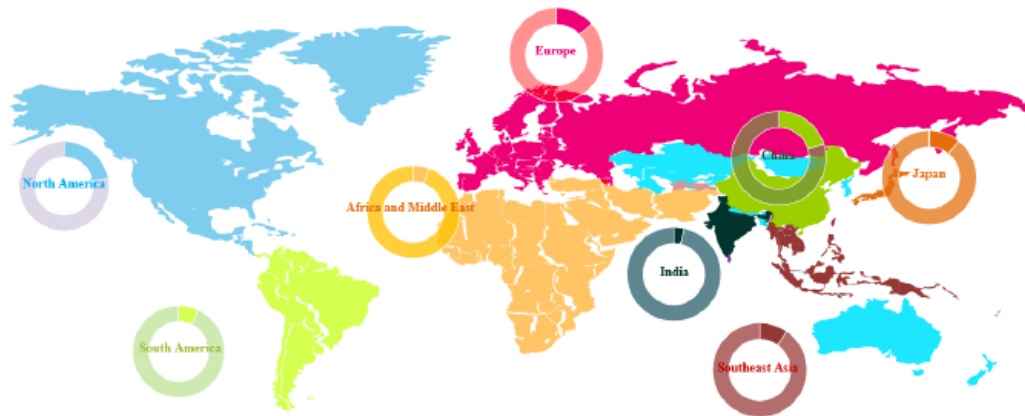

Highlights Key Points

Item	2019	2025
Global Volume	XX	XX
Global Revenue (M USD)	XX	XX
Regional Share (% revenue basis)	North America: XX% Europe: XX% China: XX% Japan: XX% Middle East and Africa: XX% India: XX% South America: XX%	North America: XX% Europe: XX% China: XX% Japan: XX% Middle East and Africa: XX% India: XX% South America: XX%

Highlights Regions

The Float Glass market can be split based on product types, major applications, and important regions as follows:

- North America
- Europe
- China
- Japan
- Middle East and Africa
- India
- South America
- Rest of the World

Highlights Players

Major Players in Float Glass market are:

- AGC
- Saint Gobain
- NSG Group
- Guardian
- Sisecam
- PPG
- Cardinal
- Central Glass
- Taiwan Glass
- Xinyi Glass
- China Southern Glass
- Fuyao
- SYP
- Vitro

Highlights-Types

Most important types of Float Glass products covered in this report are:

- Insulated Glass
- Tempered Glass
- Laminated Glass
- Others

Highlights-Applications

Most widely used downstream fields of Float Glass market covered in this report are:

- Construction
- Automotive
- Others

Float Glass Industry Development Trends under COVID-19 Outbreak

Global COVID-19 Status Overview

Labor Cost of Float Glass Under COVID-19

The pandemic of COVID-19 will have a serious impact on the supply of labor due to a decline in operating rates. Strict prevention and control measures (such as the blockade of cities and towns) will prevent the effective transfer of labor, thereby negatively affecting labor productivity. Normal business operations will be severely affected because workers are sick, afraid to return to the workplace, or unable to return to work due to strict prevention and control measures. COVID-19 has a great influence on labor employment and company labor expenditure. Take the United States as an example:

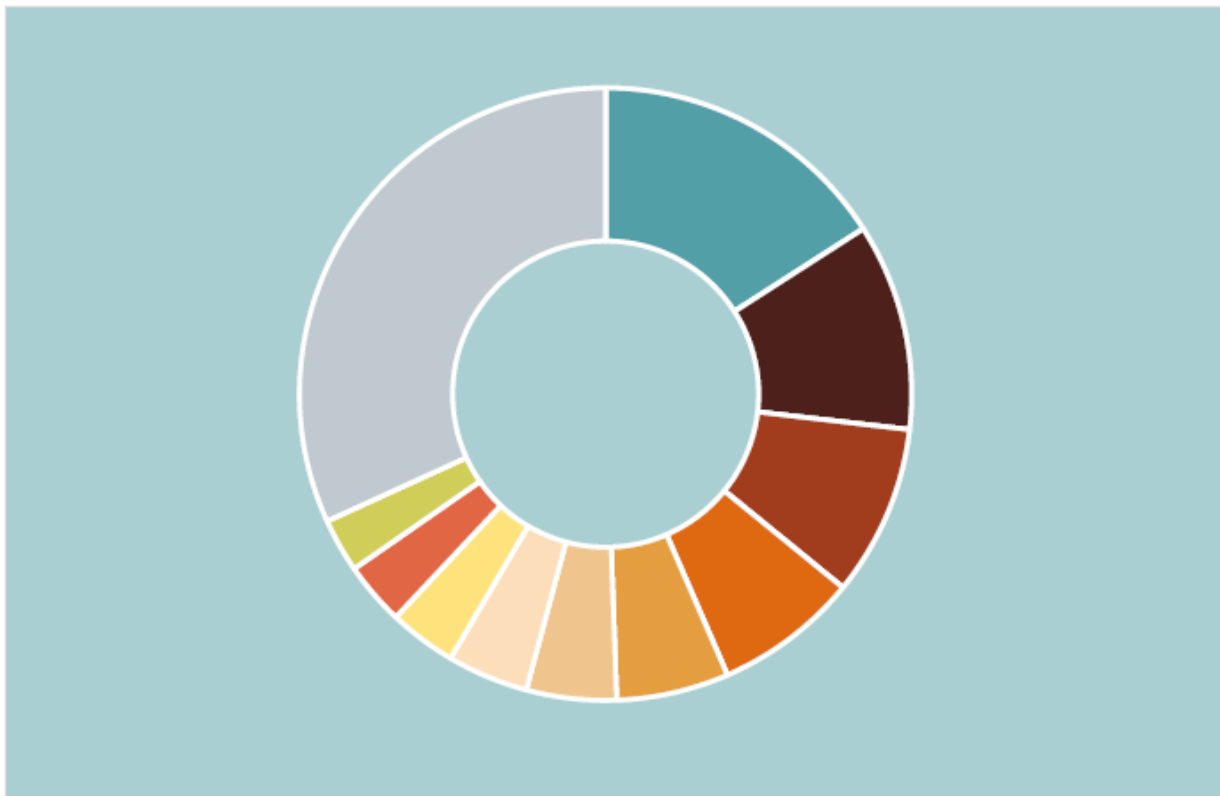

According to Fed estimates, millions of Americans are unemployed due to the coronavirus crisis, and the worst damage has not yet come. Economists in the Fed's St. Louis area expect total employment to decrease by 47 million. According to the latest analysis of possible adverse conditions, the unemployment rate is 32.1%.

If this pandemic lasts for more than a year, it may lead to the closure of large-scale enterprises, unemployment of a large number of people and further decline in consumer demand, leading to a global economic recession.

North America Float Glass Market Under COVID-19

In March 2020, the PMI of the American manufacturing industry decreased by 1.7 percentage points from the previous month to 48.7%, ending the trend of more than 50% for two consecutive months. From the perspective of major countries, the manufacturing PMI of all major countries has dropped to below 50%.

The United States is most affected by the epidemic, and the number of COVID-19 diagnoses ranks first in the world. In March, the US manufacturing PMI fell to 49.1%, a decrease of 1 percentage point from the previous month. Affected by the decline in supply and demand, employment in the US manufacturing industry has slowed significantly, and market prices have declined. The US manufacturing industry has been a key area supported by the US government in recent years.

The occurrence of the epidemic has affected the manufacturing industry that has been restored. As the epidemic spreads further, governments at all levels may adopt larger-scale control measures in response to the epidemic, and US manufacturing will continue to be under pressure in the short term. The number of new jobless claims in the United States has been increasing recently.
