## Figure Channels of Distribution

**Level Zero:** A level zero distribution channel is the simplest. It involves a direct sale from Market Players to consumers with no intermediary.

**Level One:** A level one channel has one intermediary as the middleman between the producer and consumer. An example is a retailer between Market Player and consumer.

**Level Two:** When thinking about levels, associate the number to the number of intermediaries. In this case, a level two channel involves two intermediaries between producer and consumer. An example here would be a wholesaler selling to a retailer who then sells to the consumer.

**Level Three:** Here's where an agent or broker comes in. Agents work on behalf of companies and deal primarily with wholesalers. From here, the wholesalers sell to retailers who then sell to consumers.

## 17.2 INSULATING GLASS WINDOWS Distributors List

Table INSULATING GLASS WINDOWS Distributors List

Distributors	Wholesaler	Retailers	Agents
<ul style="list-style-type: none"> <li>Involved in sales and marketing</li> <li>Build relationships with manufacturers</li> <li>Go beyond fulfilling and delivering orders</li> <li>study the market actively</li> </ul>	<ul style="list-style-type: none"> <li>Fulfill retail orders</li> <li>Resell goods in bulk</li> <li>Focus only on storage and delivery goods</li> <li>buy from distributors or manufacturers</li> </ul>	<ul style="list-style-type: none"> <li>Outlets to purchase products</li> <li>sell in stores or online</li> <li>Buy form distributors or wholesalers</li> </ul>	<ul style="list-style-type: none"> <li>Handle special shipments and contracts</li> <li>work on marketing</li> <li>Specialize in customer relationship management</li> <li>"Own" products by representing producers</li> </ul>

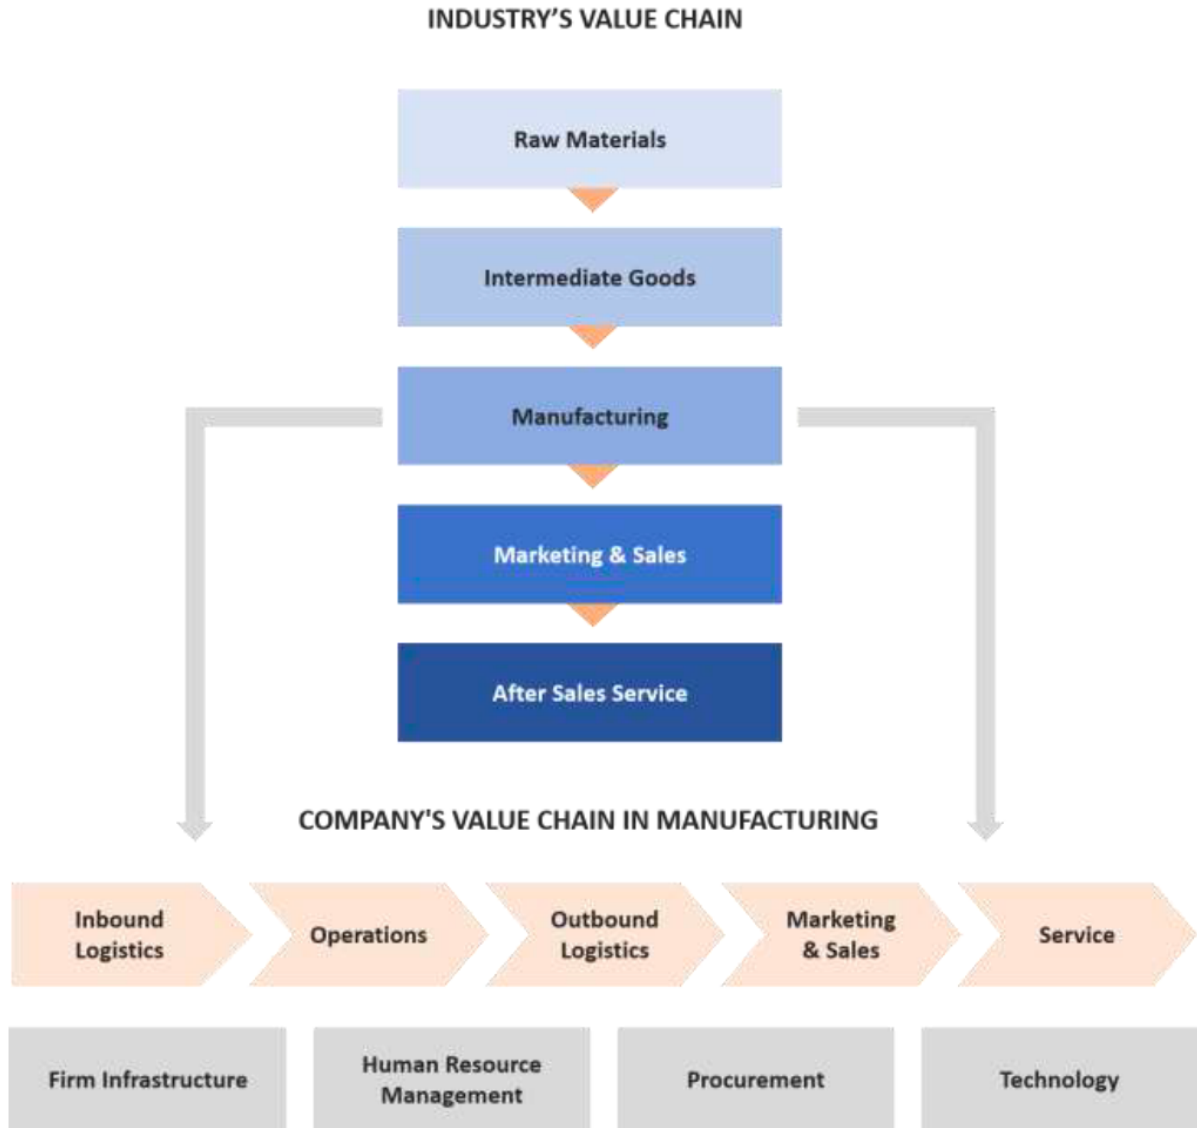

A distributor is a wholesaler who assumes extra responsibility. In addition to fulfilling retailer orders, they actively sell products on behalf of the producers. From managing orders and returns to acting as a sales representative, they go beyond being the middleman between retailers and producers. They perform market analysis and are constantly searching for new opportunities to achieve peak sales performance.

A distributor focuses on a particular area and market which allows them to cultivate strong relationships with Market Players. Unlike a wholesaler, they most likely have a stronger affiliation with particular companies. Distributors have a direct responsibility to making sure products are flying off retail shelves. For example, one distributor may work out an agreement with a popular beverage company who works with them regularly, whereas wholesalers are used on a need-by-need basis. They have the option to sell to retailers and other sellers, or directly to consumers and businesses.

When working with distributors, brands have a responsibility to oversee the process and prevent retail execution errors like out of stocks and distribution voids. This requires setting up clear lines of communication between managers, sales teams, and distributors to ensure you get that information as clearly and quickly as possible. Brands that are on top of their game form better relationships with their distributors and open up opportunities for expansion much easier than brands that communicate on an ad hoc basis.
