

www.glassglobal.com

- we help you being successful

PREFERRED PARTNERS WITH GLASS WORLDWIDE

DIRECTORY

Your gateway to glass manufacturers and machine suppliers worldwide

The international directory is the most important element of this portal website. It is a channel to thousands of different profiles of glass manufacturers, suppliers, traders and institutions. The information included in this Annual Directory of Suppliers is generated from the glassglobal.com Directory – for more details on the companies included in these pages, visit www.glassglobal.com. **If you are a supplier to the glass industry, register your company at glassglobal.com or update your existing details to ensure inclusion in the 2008 edition of the Annual Directory of Suppliers!**

TRADE

Profit from our long-term experience in the glass business

Companies are provided with a feature to post ads for new and used equipment, as well as publish tenders to invite offers. The Machine Market is divided in two main features (Sell & Buy).

NEWS

Your daily channel for international news

Our news department provides you with actual and daily updated international glass news covering all areas from production

technology machines, companies to products in various languages.

GLASS TECHNOLOGY

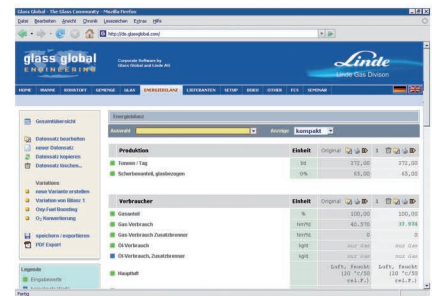

First choice for glass manufacturers

Covers the whole production process of all production variations, from container glass to flat glass, tableware, stemware, technical glass but also tube drawing processes, just to name a few – starting with raw material supply to furnace and production machines until final decoration and packaging. Special features for Technology Members include Search Engine Optimisation, Project Information, Contact Details and Questionnaires.

ENGINEERING

Glass Engineering Software

Glass global and Linde Gas have teamed up and have developed the world's first analysis tool that allows them to quickly and easily analyze melting process

Produktion		Einheit	Original	1	2
Stemmen Tag	100	210,000	210,000	210,000	210,000
Schmelzwerk, Glasformen	100	60,000	60,000	60,000	60,000

Verbreiter		Einheit	Original	1	2
Gewicht	%	100,000	100,000	100,000	100,000
Gewicht	%	60,000	60,000	60,000	60,000
Gewicht	%	100,000	100,000	100,000	100,000
Gewicht	%	100,000	100,000	100,000	100,000
Gewicht	%	100,000	100,000	100,000	100,000

parameters. Calculations cover complete energy balances, batch and raw material as well as glass composition calculation. Special features are the calculation of the glass characteristics as well as the conversion to other fuels or gases. Evaluate and simulate, how Oxy-Boosting could save energy and cost!

The Online Glass Engineering Program is an all-in-one solution. This means huge transparency for glass producers as all modules are mutually compatible. Highly favourable conditions make it the most economic way for glass producers to reduce costs and optimise processes.

JOBS

The Job Market

Companies can post their job offers to invite qualified applications from anywhere. Everybody, from expert to apprentice, looking for a news challenge can apply for job offers or post a free job request under Cipher Number, respecting full privacy.

LOG ONTO www.glassglobal.com NOW!

The world's leading e-commerce website! Launched in 2000, www.glassglobal.com has already confirmed its position as leading international portal for the glass industry, among others owing to its cooperation with international media partner websites such as glass.com, glass.com.cn, and advertisements and articles in our preferred magazine, Glass Worldwide, and other printed media.

Our statistics continuously show about 300,000 different visitors per month and far over 3.4 million page impressions. Glassglobal.com's international strategy proves that these figures continue to increase strongly within the next few months.
